

Continuing Education for Architects

Earn Free Continuing Education Credit by learning about the science and benefits of commercial doors and frames!

As the leader in FRP door technology and custom door solutions, Special-Lite is on a mission to connect with and support architects, engineers, designers, consultants, and anyone looking to better understand innovative products and their applications.

AIA CEU Courses *In-Person or Live Virtual Courses* **FREE!**

FRP-101: Heavy-Duty Flush Doors for Commercial Entrances

Dive into what makes a functioning entrance. Then, learn how to evaluate design, construction, durability, environmental considerations, and performance to choose the right door for your project.

FRP-201: Exterior Doors for Performance and Sustainability

Understand how sustainability goals and high performance can work together when evaluating commercial doors.

FRP-301: Specifying Doors for Corrosive Environments

Review what causes various types of corrosion in commercial environments, how to prevent it, and how to properly specify a door for corrosion resistance.

FRP-401: FRP Entrances: The Science Behind the Door

Learn the fundamentals of fiberglass, including its history and benefits, and the materials and methods used to manufacture doors and frames in a variety of textures and finishes to meet different requirements.

AEC Daily *On-Demand Online Courses* **FREE!**

Special-Lite has partnered with AEC Daily to offer free, self-paced, on-demand courses about the science behind our resilient products and what benefits they offer across various industries and building applications. Check our company page on aecdaily.com for the most up-to-date course offerings for HSW and CEU credit!
